

Live the

PRIME

life!

A DREAM
COME
TRUE!

PRIMARY BENEFITS

Your personal healthcare professional

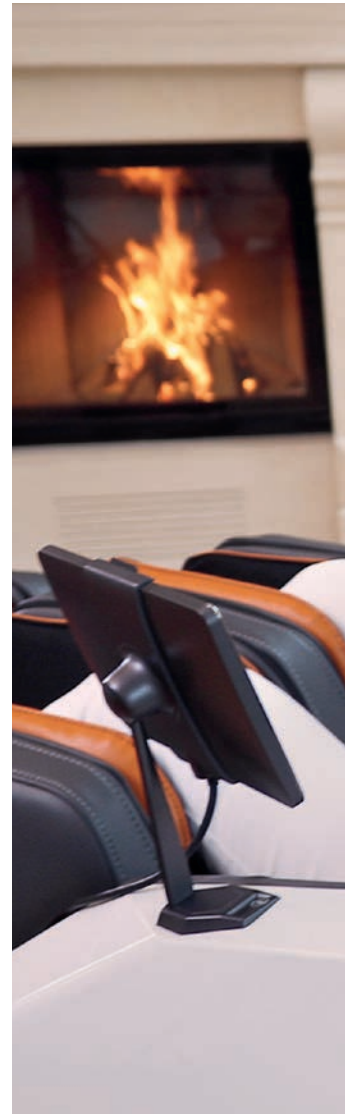

You'll be missing home, when PRIME is waiting for you. This massage chair combines new generation technology with high quality design to give you the ultimate relaxing experience focused on strengthening your health. Take a break from life's hectic rhythm in a safe "nest" designed to make your dreams come true.

A life without pain

Say goodbye to discomfort: the PRIME massage chair has special functions for each part of your body, and it envelops you in comfort – literally from head to toe!

Well-deserved reward after a hard day's work

The PRIME's dedicated functions help you get rid of the symptoms of the "diseases of modern professions" such as neck and lumbar discomfort, or other pain due to incorrect posture.

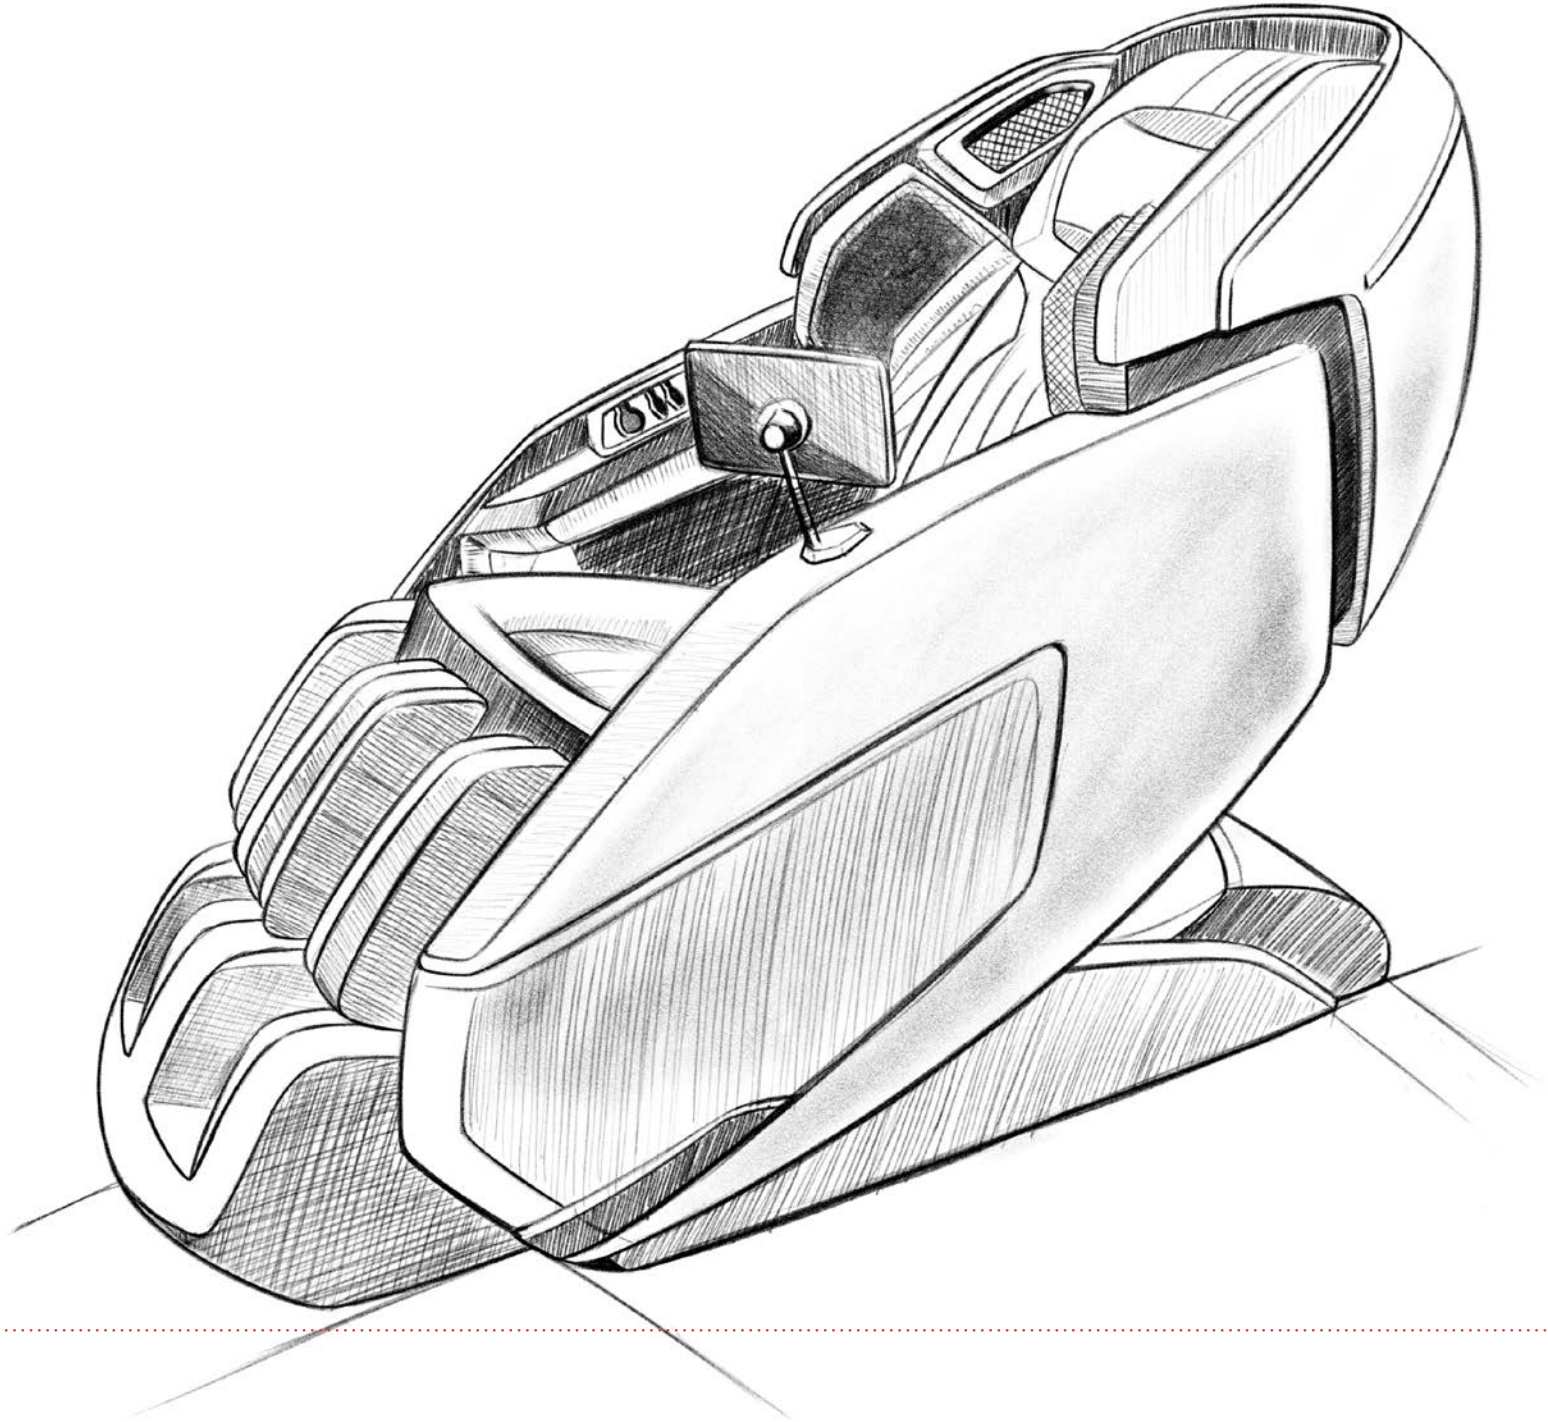

Physical and spiritual relaxation

Have a seat and start playing your favourite tunes. The PRIME massage chair is created to help you relax your body and your soul by combining technology, design and exclusive craftsmanship.

A healthy lifestyle

The health benefits of massage therapy have been known for millennia, and modern medicine has confirmed this. The PRIME massage chair alleviates the negative effects of a fast-paced and stressful lifestyle.

EVERYDAY LUXURY

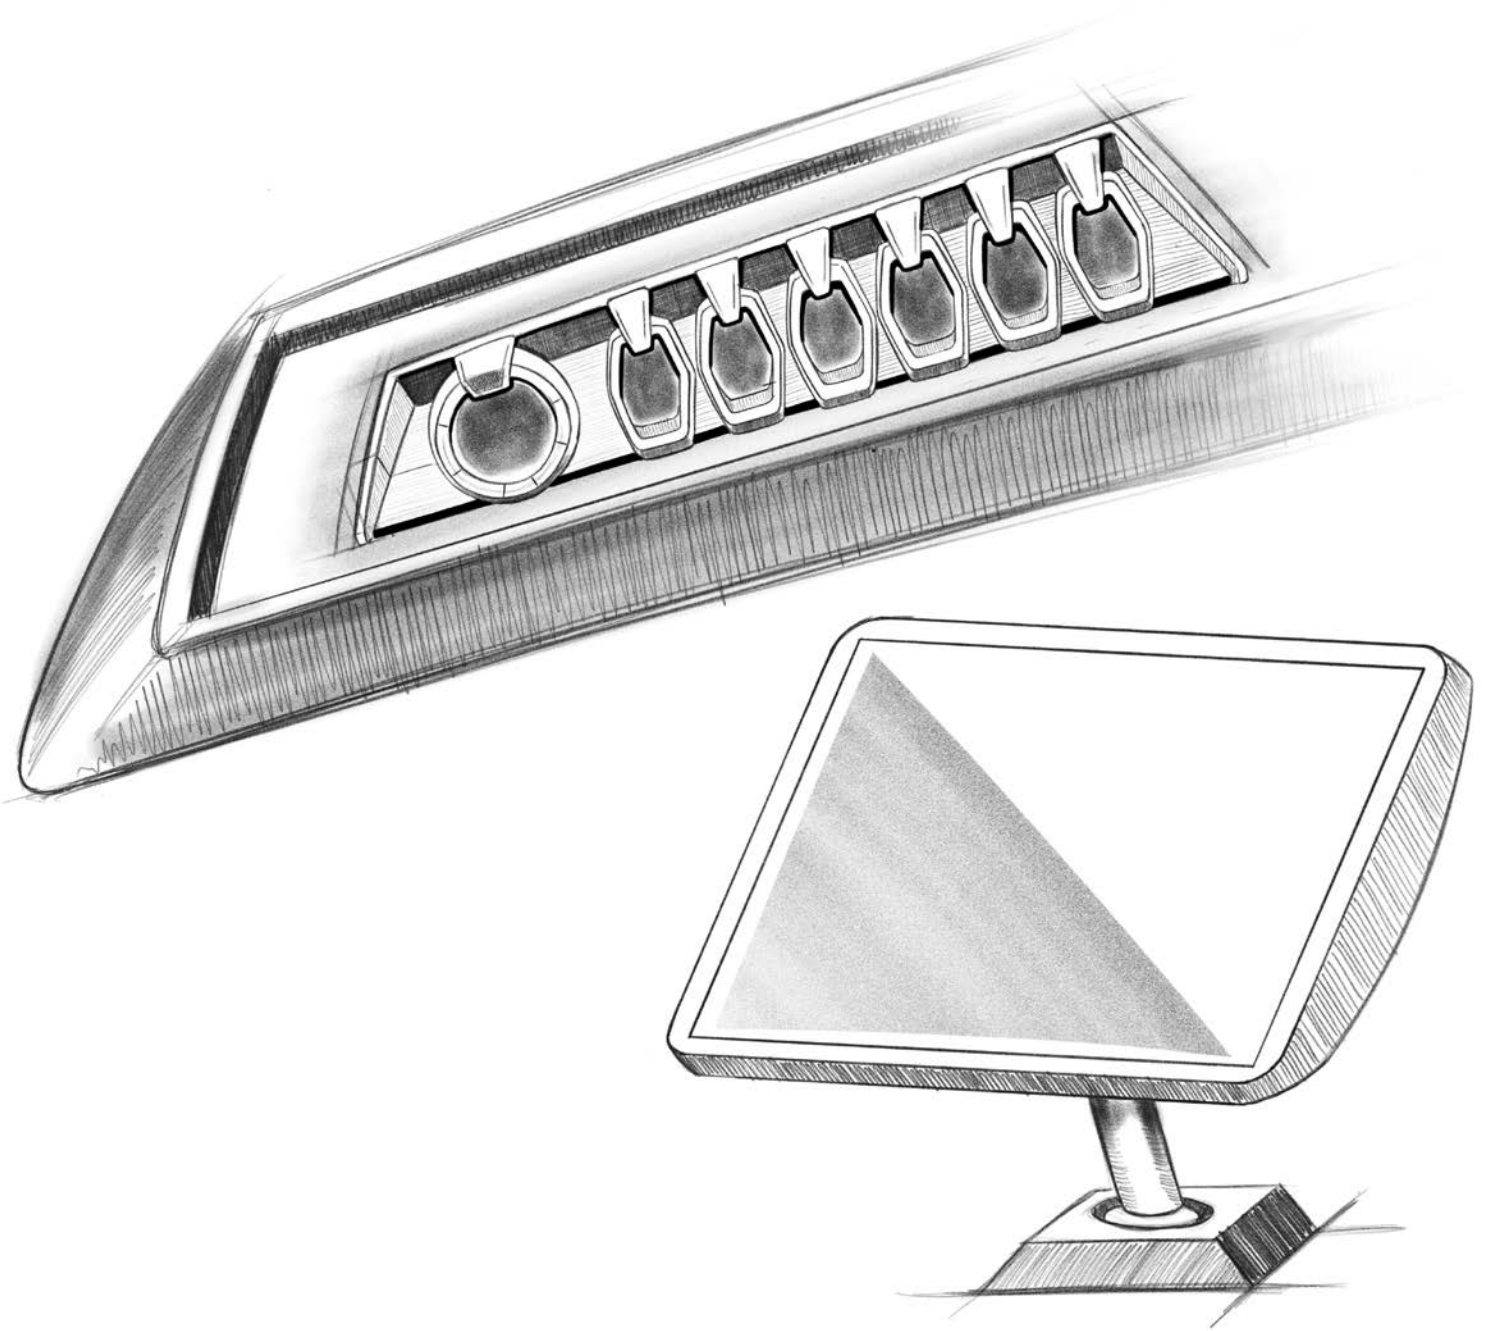

*Your Prime friend
from dawn till dusk.*

The PRIME massage chair includes 12 automated wellness programs designed for your wellbeing – from the early hours of the morning till the long evenings when you simply need a few minutes of rest and relaxation. You can even set a timer to fit it in your daily program.

- > Rise and shine
- > Comforting nap
- > Preparing for a good night's rest
- > Stress relief program
- > Delicate care program
- > Light stretching
- > Thai stretching
- > Deep shiatsu
- > Royal treatment
- > Neck and shoulder treatment
- > Back and spine treatment
- > Waist and hips treatment

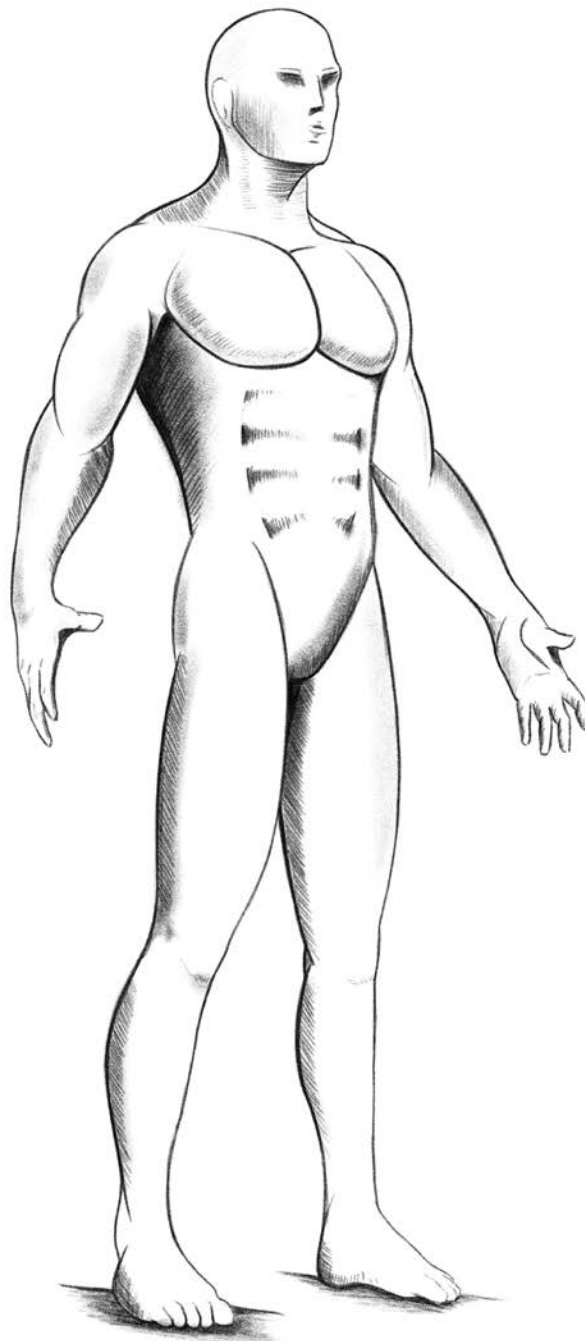

TECHNOLOGY

Technology for health

Technology is often the main reason for our stress, because it keeps us on our feet, and gives us a long list of things to do. PRIME revolutionizes the equation: our research and development department puts technology at the service of your health and wellbeing. No stress!

AI-ASSISTED SCANNING

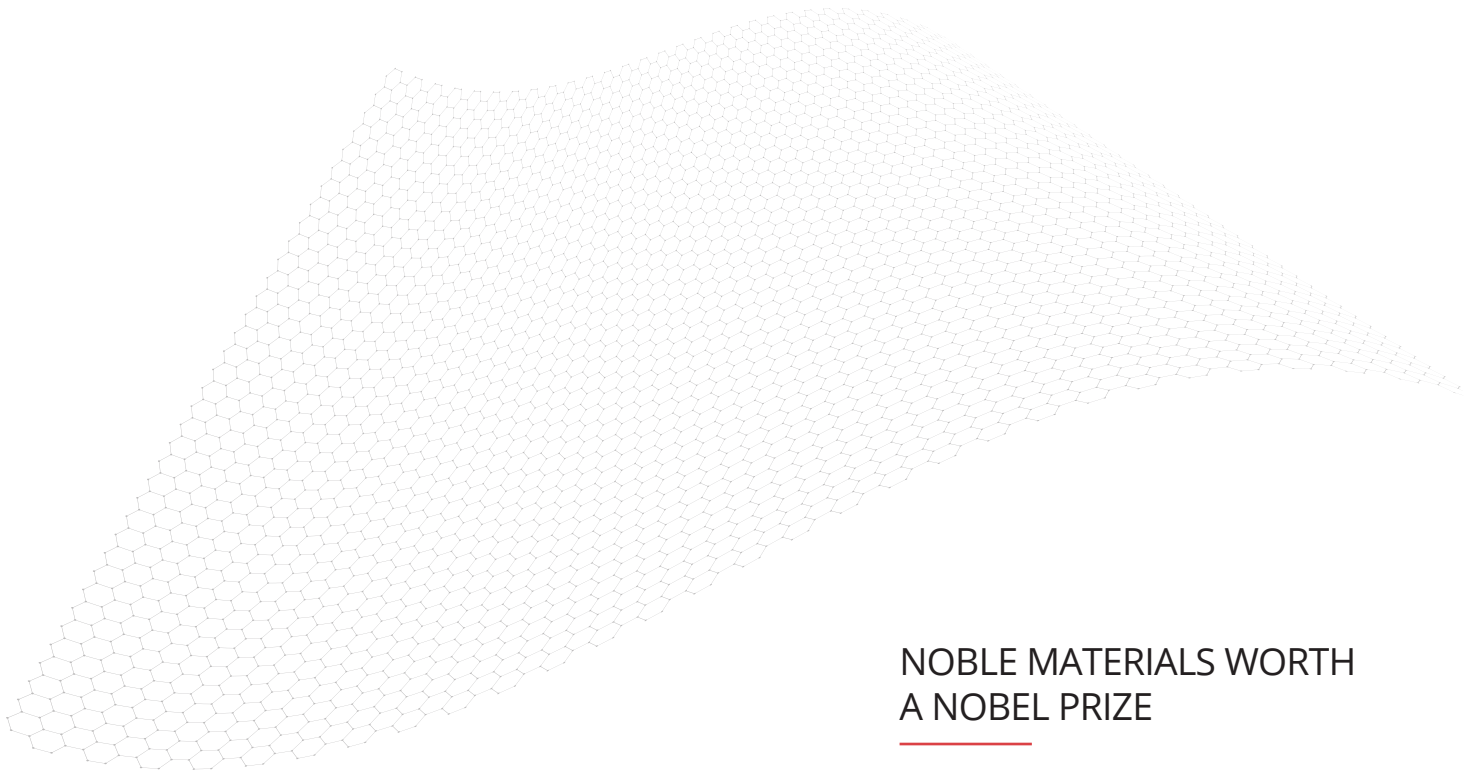

PRIME knows its job. It has built-in advanced sensors and an intelligent algorithm, which provide a detailed analysis of your body by registering key data points, providing quick feedback and a precise control over the body-scan and the massage functions.

PRIME INNOVATION: FLEXIBLE RAIL

The flexible massage rail is the “backbone” of the PRIME massage chair, which adapts by opening up and following your back’s natural arching. This is how it is able to ease you into gaining a specific posture necessary for enjoying the Thai stretching massage.

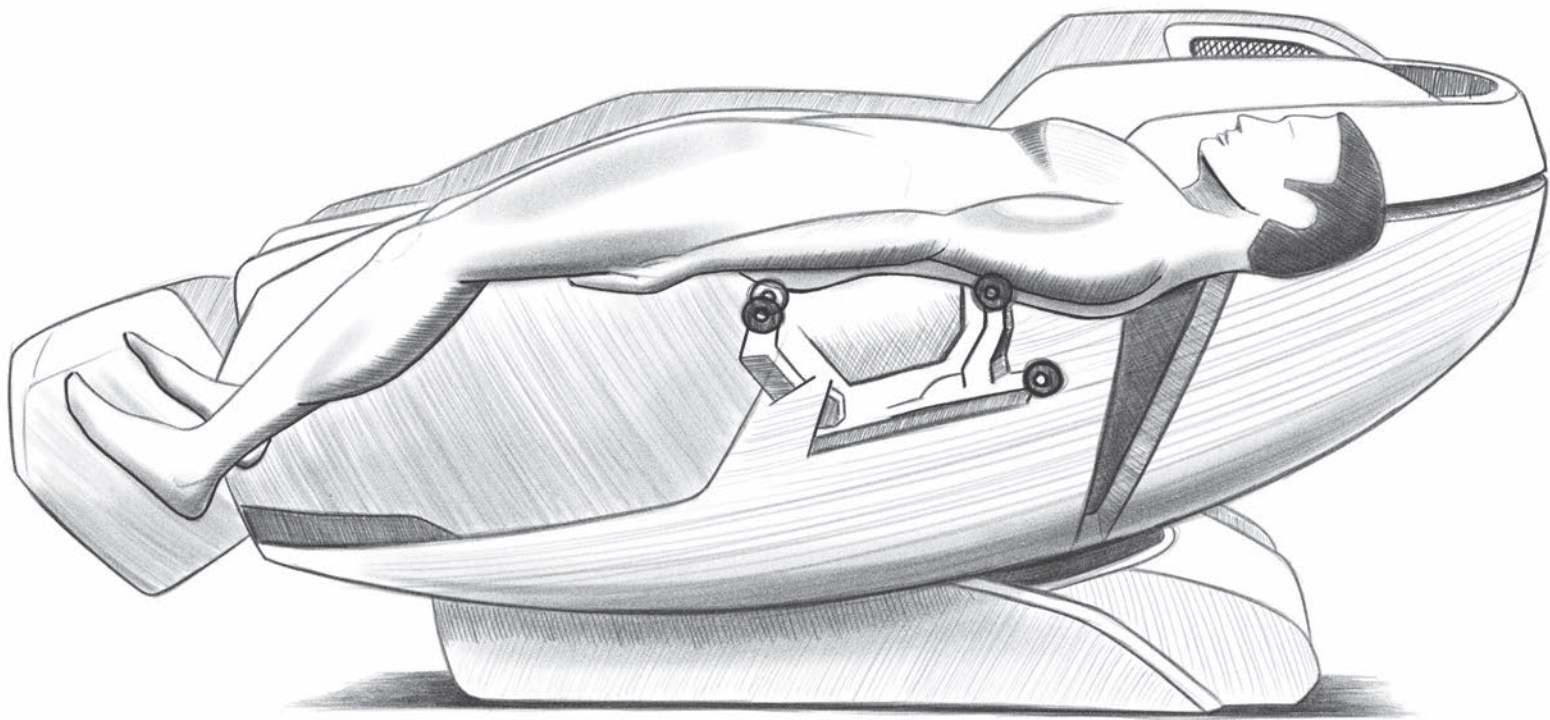

DOUBLE MECHANISM, DOUBLE THE EFFECT

The 3D massage mechanism for deep tissue joins forces with the specialized mechanism for waist and buttocks. What’s the effect? A synchronized massage similar to the simultaneous four-hand massage done by professional massage therapists.

NOBLE MATERIALS WORTH A NOBEL PRIZE

The Swedish Academy awarded a Nobel prize to the inventors of graphene. PRIME offers you graphene heating, that doubles the efficiency of the massage, stimulates blood flow, reduces pain and muscle stiffness.

FULL MASSAGE

Complete relaxation

Komoder PRIME combines all the positive aspects of previous models with innovations from a detailed research and development process, so that your experience may be truly unique. Our new model gives you steeper angles, full body coverage and several interworking systems that provide you with increased efficiency.

Two back massage axels

Straight rail system.

The massage mechanism covers the whole upper body in a straight line running on the length of the back from the neck to the waist.

Flexible rail system.

This patented innovation arches your back to specifically prepare your posture for a Thai massage.

Three types of mechanism

Fixed mechanism

It works where it matters the most. It doesn't move up or down and can't bulge out or retract.

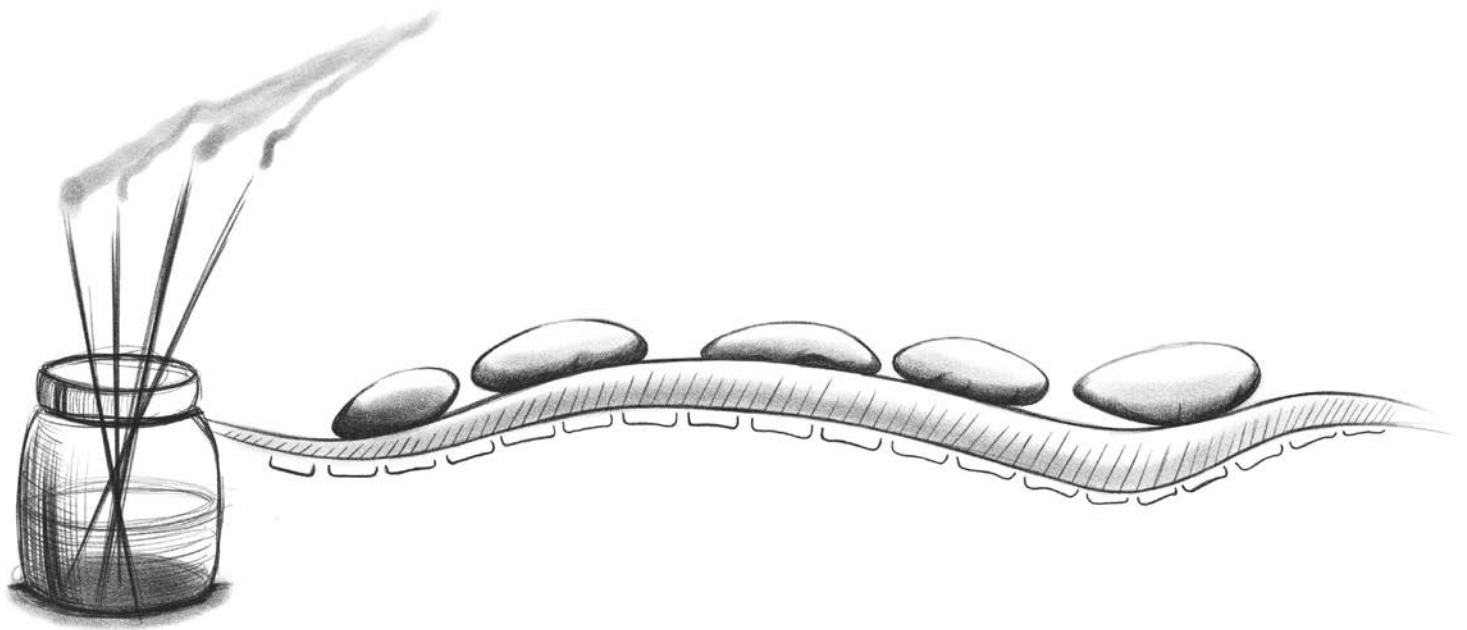

2D mechanism

It moves up and down, left and right, reaches the entire surface of your back, but doesn't jut out to follow the body's natural curves.

3D mechanism

The 3D mechanism is designed for deep tissue massage and it works in conjunction with a specialized mechanism for the waist and buttocks. It offers a synchronized massage similar to the four-hand massage given by trained professional massage therapists.

MASSAGE TECHNIQUES

for mind, body and soul

Synchronized kneading and tapping

The massage rollers provide synchronized kneading and tapping massage on the entire length of the back combating muscle stiffness.

Rhythmic knocking

The massage rollers provide rhythmic knocking on the pressure points on the back meridian and travel downwards along the spine to relax the entire back.

3D Shiatsu

The massage rollers extend and retract 8 centimetres offering a deep massage to the meridians and the energy channels of the body.

Intense pressing

The massage rollers target specific pressure point along the back meridian. This is the only pressing that relieves pressure!

Delicate kneading

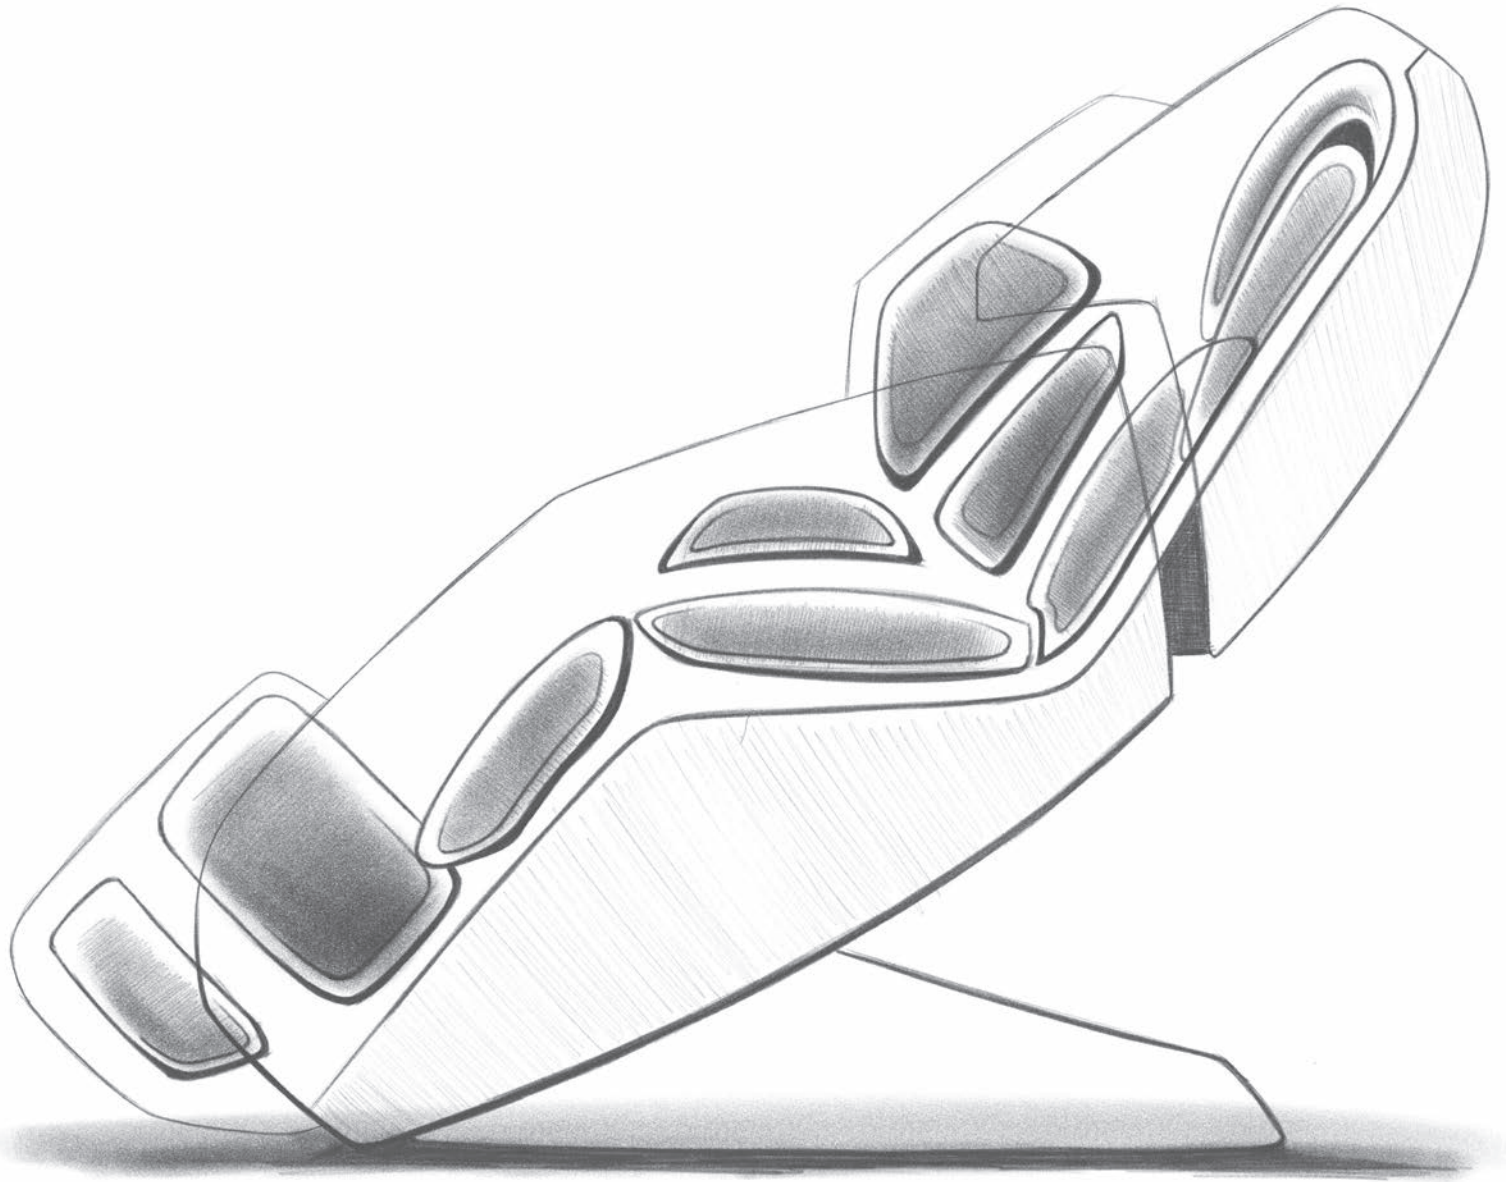

Get rid of muscle tension with these delicate movements. The massage rollers do a rotating movement, and you will immediately feel their great effect.

Deep Shiatsu

The massage rollers apply pressure to the meridians and move down your back to release the blockages.

PRIME HAS YOUR BACK...

from head to toe!

Neck

- Combined pinching, lifting and pulling movements for the neck that clears your mind and contributes to a better memory, maybe even a better mood.

Shoulder blades

- This is a sensible area and needs delicate and innovative therapy. This new program is perfect for training and relaxing this area. The program has several beneficial effects for your entire back.

Waist

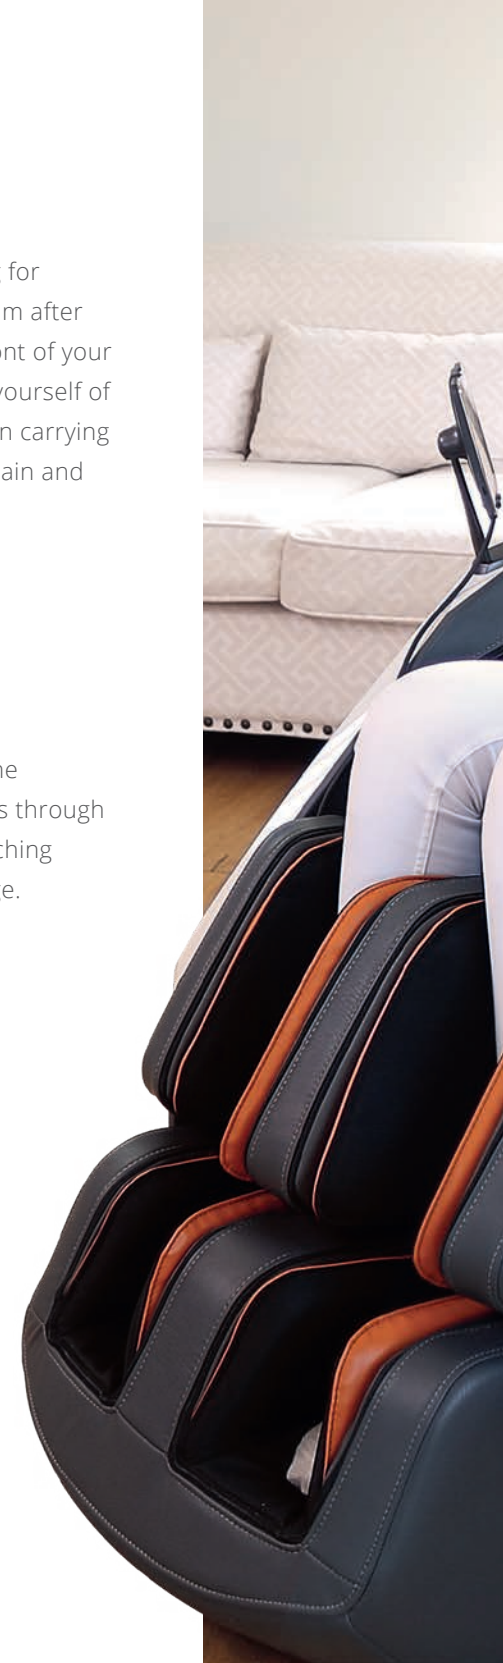

- Thai stretching helps relax the waist muscles and strengthens the spine in the lumbar area having beneficial long term effects for your posture. You are preventing future problems!

Shoulders

- Applied pressure and kneading for the shoulders: a perfect program after a long day at the office or in front of your computer. It helps you relieve yourself of all the burdens that you've been carrying all day long. Forget about the pain and the tension!

Chest

- It improves the flexibility and the mobility of the thoracic muscles through a new technique of chest stretching that mobilizes the entire ribcage. Breathe easily!

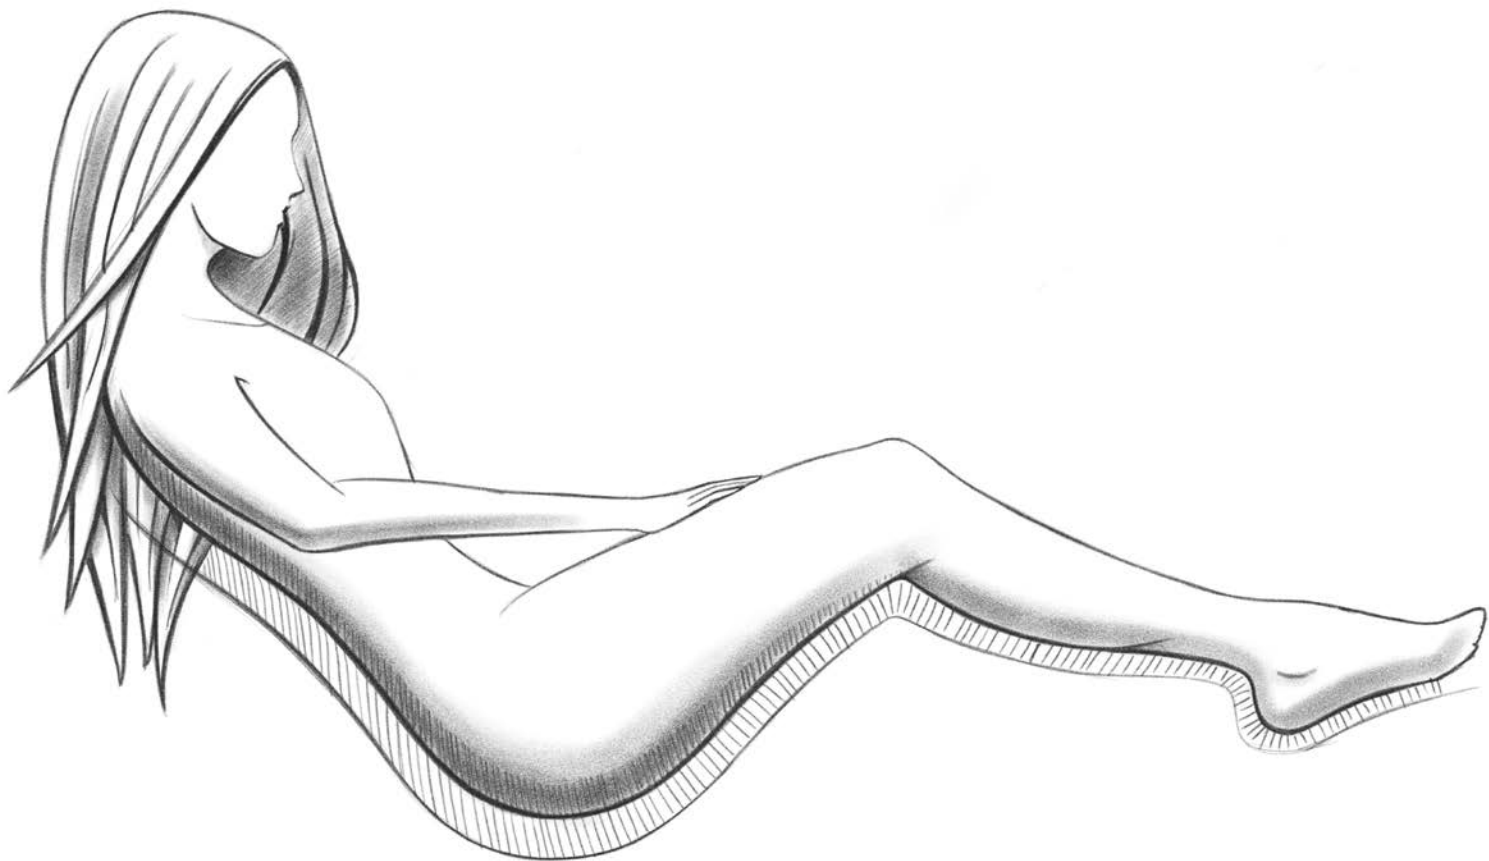

Feet

- 18 airbags incorporated into the legrest together with the built-in graphene rapid heat radiator help relieve muscle tension and stimulate blood flow to the legs and feet.
- The rollers ridged with protuberances dedicated to massaging your feet stimulate pressure points.
- Do you have sensitive feet? PRIME offers 5 intensity settings for the feet's air pressure massage.

Legs

- The legrest has a double role. It is a patented innovation that offers support and traction in both directions and automatically adapts to the user's height.

START FLOATING!

We'll provide the cloud!

Have a seat in your PRIME massage chair and escape gravity. 38 airbags engulf your body and cradle it so that the massage reaches its full effect while you relax listening to your favourite music.

Warm nest in your own home

In 2010 two physicists received the Nobel prize for discovering graphene, a form of carbon with amazing capabilities that originate from the wonderful world of quantum physics.

This year, Komoder PRIME uses graphene to benefit your health. Used as a heat conductor this novel carbon based material far surpasses the performance of all known materials. The infrared radiation it emits is considered ideal therapy for natural healthcare.

RELAXATION BY DESIGN

It turns heads and attracts gazes

The form serves the function

A well-crafted simple design covers an interior dedicated to providing perfect comfort. The design of the PRIME massage chair showcases the patented Komoder technology: flexible rail that takes the massage experience to an entirely new level.

We use elegant materials and subtle lights. We included multimedia functions that all work together to provide you with the best massage experience possible in a setting dedicated to your personal pampering.

Ideal for your house

The PRIME massage chair needs merely 5 centimetres of clearance from the wall. The chair slides forward and reclines with the use of two synchronized mechanisms to save space and simultaneously offer you a completely relaxing position.

The elegant design turns the PRIME massage chair into the focal point of any room.

Unique, balanced, remarkable

PRIME uses elegant lines and contours amplified in a modernist aesthetic. The contrast between the concave and convex shapes creates a space that continuously offers you a heightened sense of intimacy and safety.

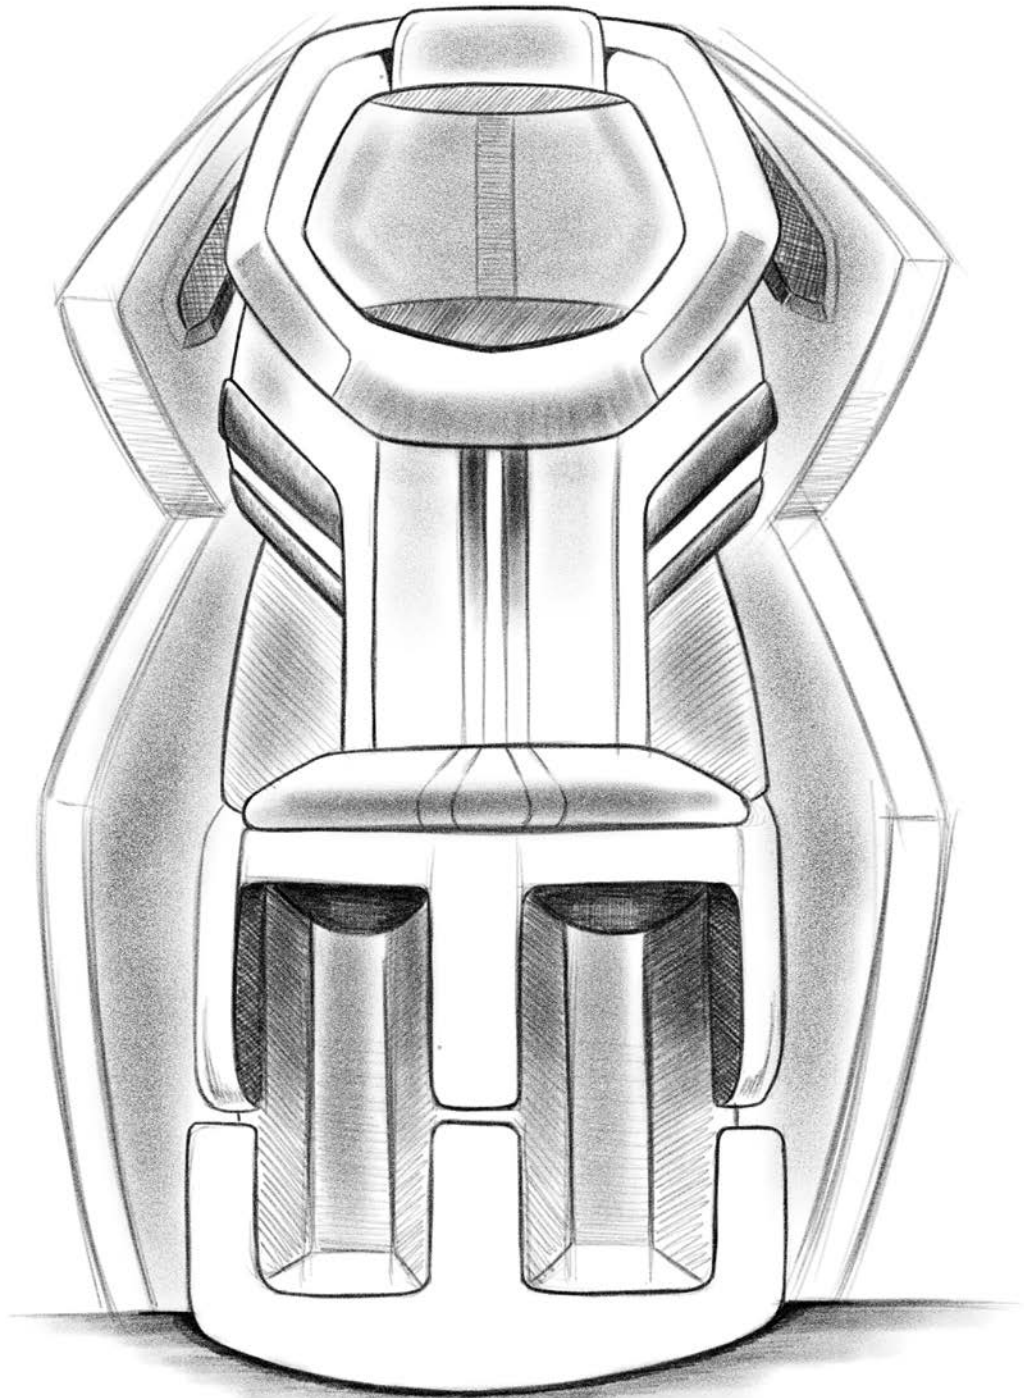

Elegant joints

The side panels are designed with elegant joinery creating a three-dimensional effect and making it possible for the PRIME massage chair to seamlessly blend in to the majority of ambient settings. Surely PRIME will be at home in your home!

Luxury materials

High-end premium materials, such as leather and granulated wood, that underwent the most rigorous testing have passed all industry standards, and give the user the feeling of luxury and hand-made craftsmanship.

A SPACE OF
ABSOLUTE COMFORT
interior design

Advanced eco-materials

PRIME uses advanced synthetic polyurethane leather, that has a fine texture and pleasing aesthetic. The surface is delicate to the touch, and comfortable from the onset. It is easy to clean with a simple wet cloth. PRIME is certified to be in accordance with all environmental and quality standards. This is a guarantee to the fact that in the making of the product no materials have been used that would be harmful to man or to the environment. The production process is in compliance with the Directive on the Restriction of Hazardous Substances (RoHS).

Unique pillow design

The synthetic polyurethane leather cushions of the PRIME massage chair have a unique woven design. PRIME makes sure that each part of your body is well supported by one of the pillows included in the package: a full sized seat cushion, a large and a medium pillow for your back, a small pillow for the head.

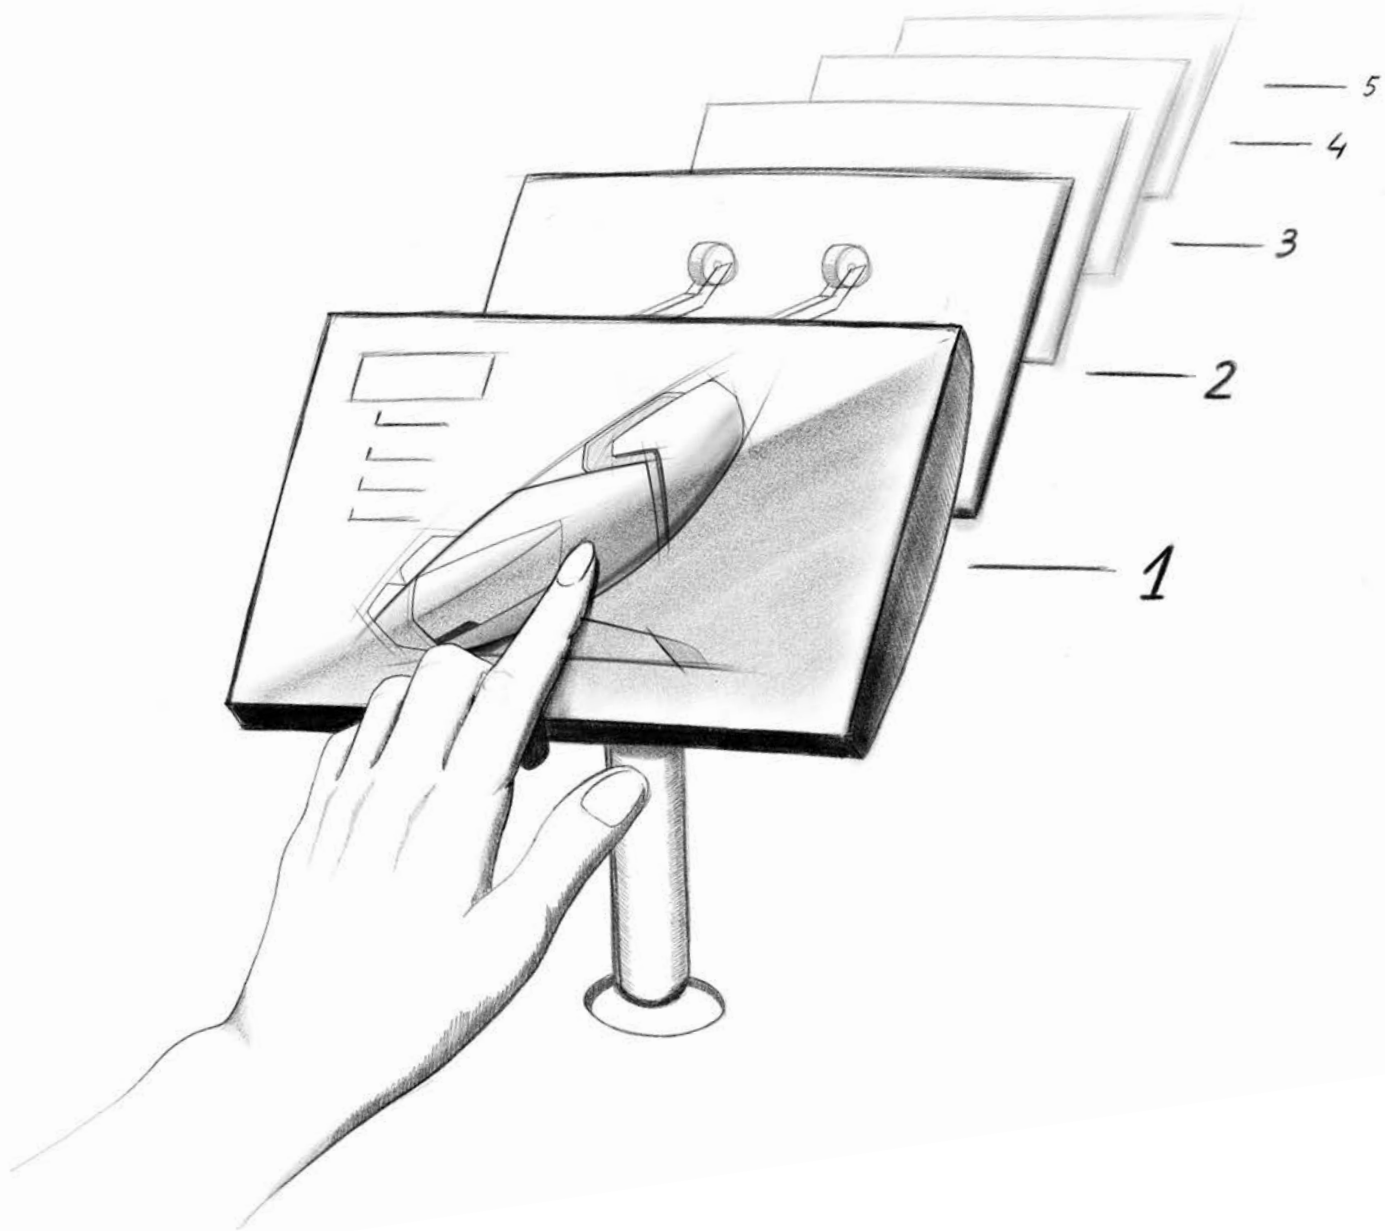

PRIME pillows are designed to contribute to a personalized experience. Use them to experience a soft massage or remove them for a firmer one.

Dynamic LED lights

The lighting combines the latest designs in the field: hidden LED-lights with a subtle effect, that change their colour on both sides and so redefine the space in which you are invited to relax.

ADDITIONAL FUNCTIONS

For extra experiences!

Full control with a single touch

The touchscreen remote give you access to all of PRIME's functions with a single touch. This includes the most advanced settings as well, such as pairing smart devices with the massage chair. The icons have been selected with care to make everything intuitive and handy. The armrest has 7 quick access buttons to facilitate access to the basic functions of the massage chair.

For the friend that's always by your side

An increasingly larger part of our life is happening on our mobile phones. PRIME helps you stay connected. The massage chair pairs with your favourite smart device via the Bluetooth function so you can listen to your favourite songs through the built-in system. A dedicated USB port provides charging to your trusted friend while you are getting your boost of energy.

Surround sound

Do you want to close your eyes and float on PRIME's airbags that keep your whole body gliding in this state? Try accompanying this amazing feeling with your favourite music playing from the NICAM surround sound speakers that accurately render the full range dynamic of the sound. Relax, dream on and let your soul experience the true sense of wellbeing!
