TITAN II:  
A PEERLESS CHOICE

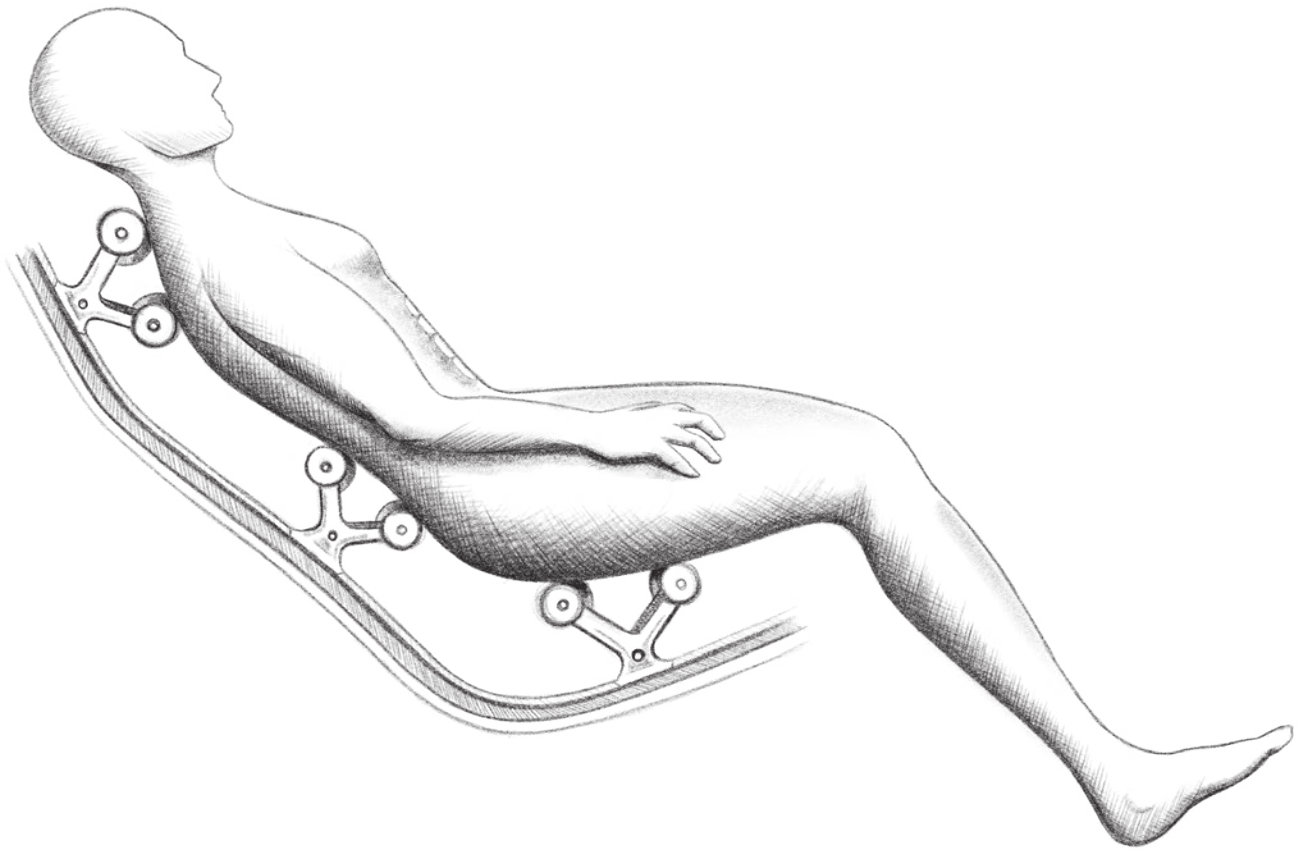

Your entire body will be so grateful after a few minutes spent in this brand new Titan II model. We doubled the number of massage programs on Titan II. It has functions dedicated to every moment of life and every area of the body, so as to perfectly respond to the needs of each user.

A premium product, dressed in an elegant design and tailored in luxury materials, the TITAN II massage chair is revolutionary in its ability to adapt to the size of the body and to act through the embedded technologies: a double rail and 3D massage mechanism with eight contact points in the back area, triple reflexology rollers, shiatsu palm massage option and advanced calf kneading system.

THE FIRST MASSAGE  
CHAIR WITH DOUBLE  
COVERAGE POWER

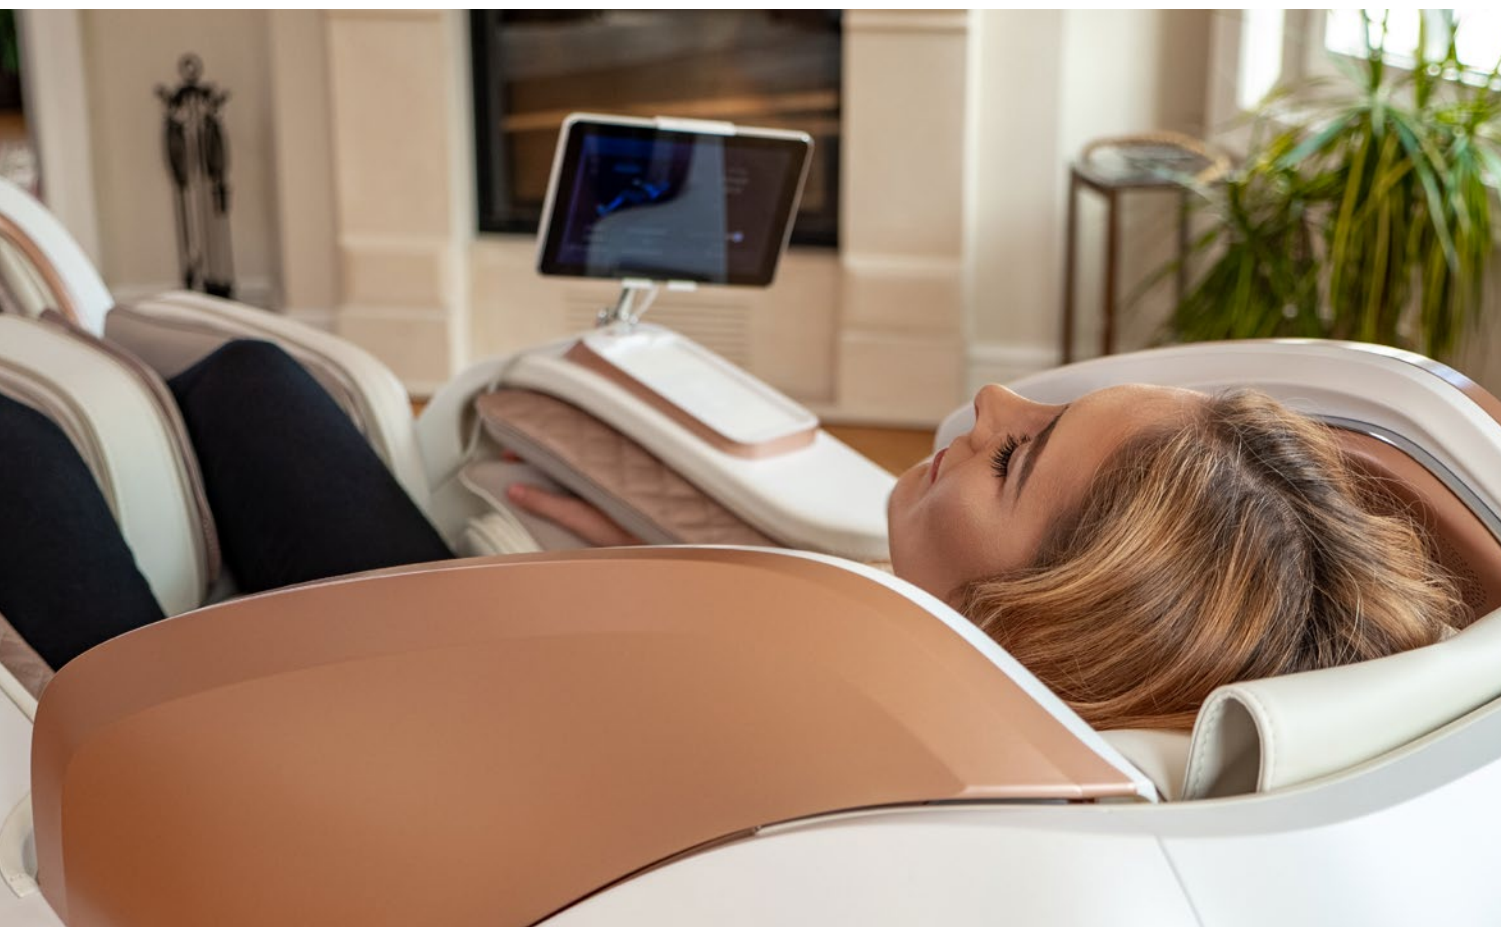

An exclusive innovation of the new TITAN II massage chair is the use - for the first time - of two flexible SL- shaped rails, each dedicated to one of the massage systems that act integrated.

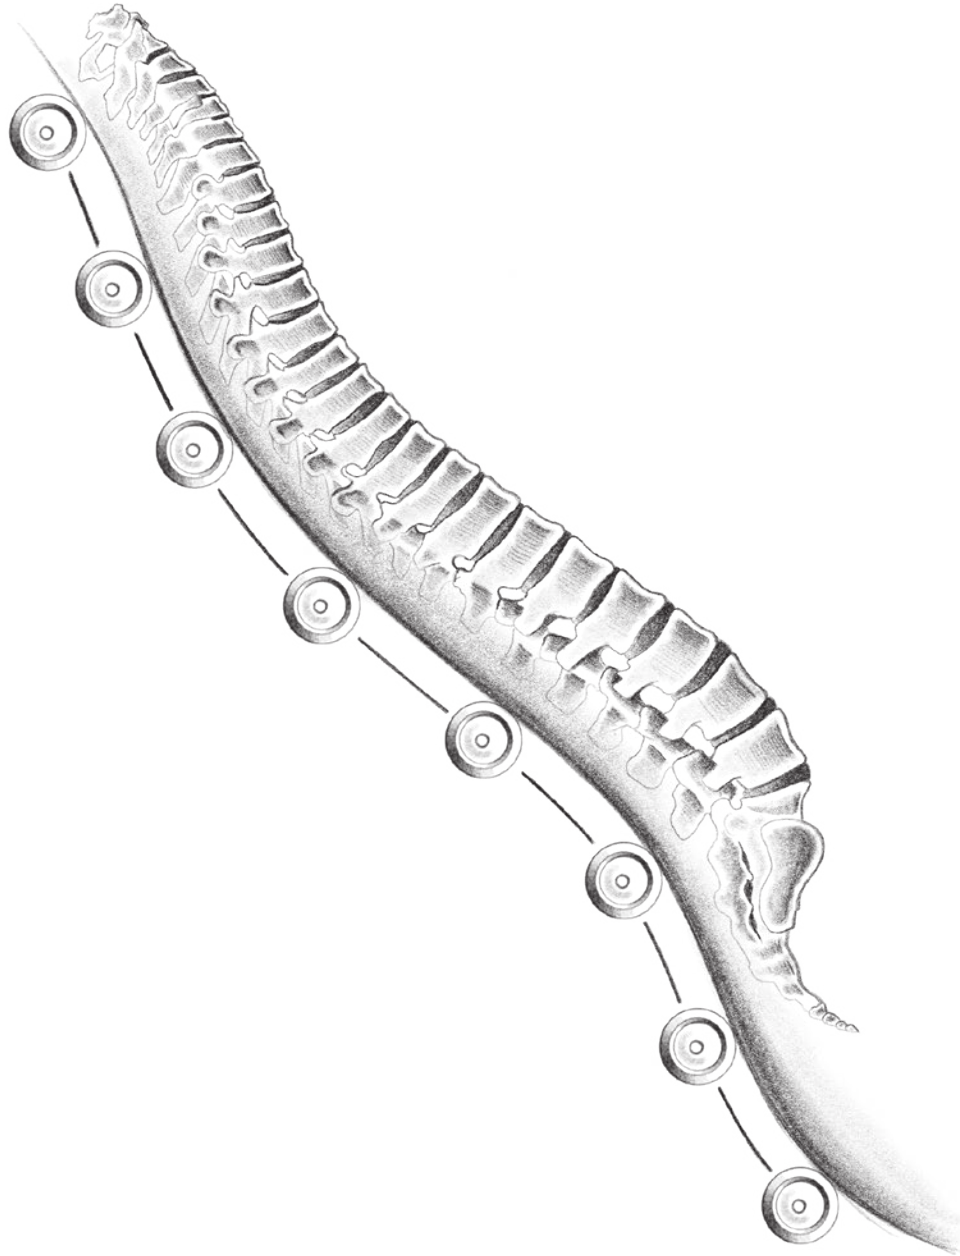

The rails slide during operation to ensure a full massage covering the entire length of the spine, the waist and thighs.

A 1045 mm stretch ensures perfect coverage of the sensitive points and a massage that removes fatigue, stimulates circulation and increases muscle viability.

The muscles will also relax thanks to the carbon fiber heating system, which offers a uniform and constant temperature for an ultracomfortable feeling.

# EIGHT SIMULTANEOUS MASSAGE POINTS

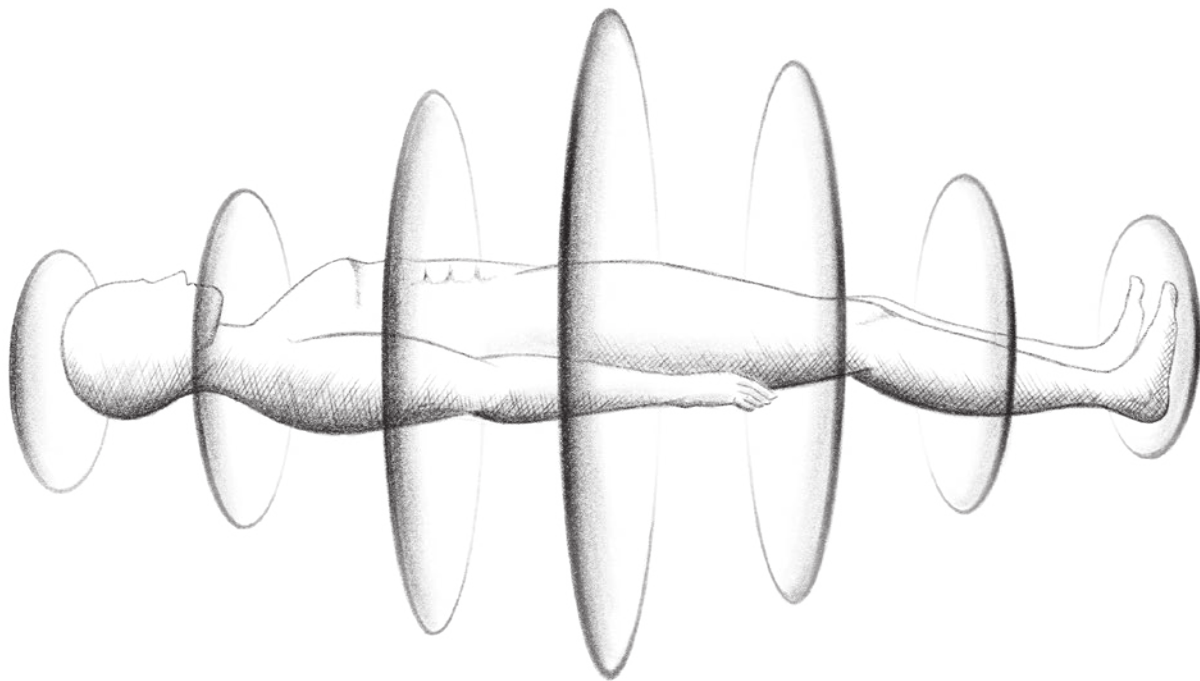

Once you're in TITAN II, two 3D massage arms, each equipped with four points of contact, will start working together to pamper your back.

The first offers a deep massage of the cervical area, descending on the back to a length of 784 mm, while the second is a mechanism specialized in lumbar massage, covering 861 mm from the back to the thighs and stimulates the sciatic nerve. The two have in common the power to apply effective techniques, such as kneading or shiatsu massage, and act integrated to give you an unprecedented experience in the world of massage chairs. TITAN II has a massage system for the palms as well, being the first massage chair equipped with such a function.

For people who spend a lot of time in an office chair, for those who want to improve their muscle mobility or who want an unparalleled massage of the entire upper body, the new generation TITAN II responds perfectly to these desires.

INTELLIGENT SCANNING  
FOR TOP EFFICIENCY

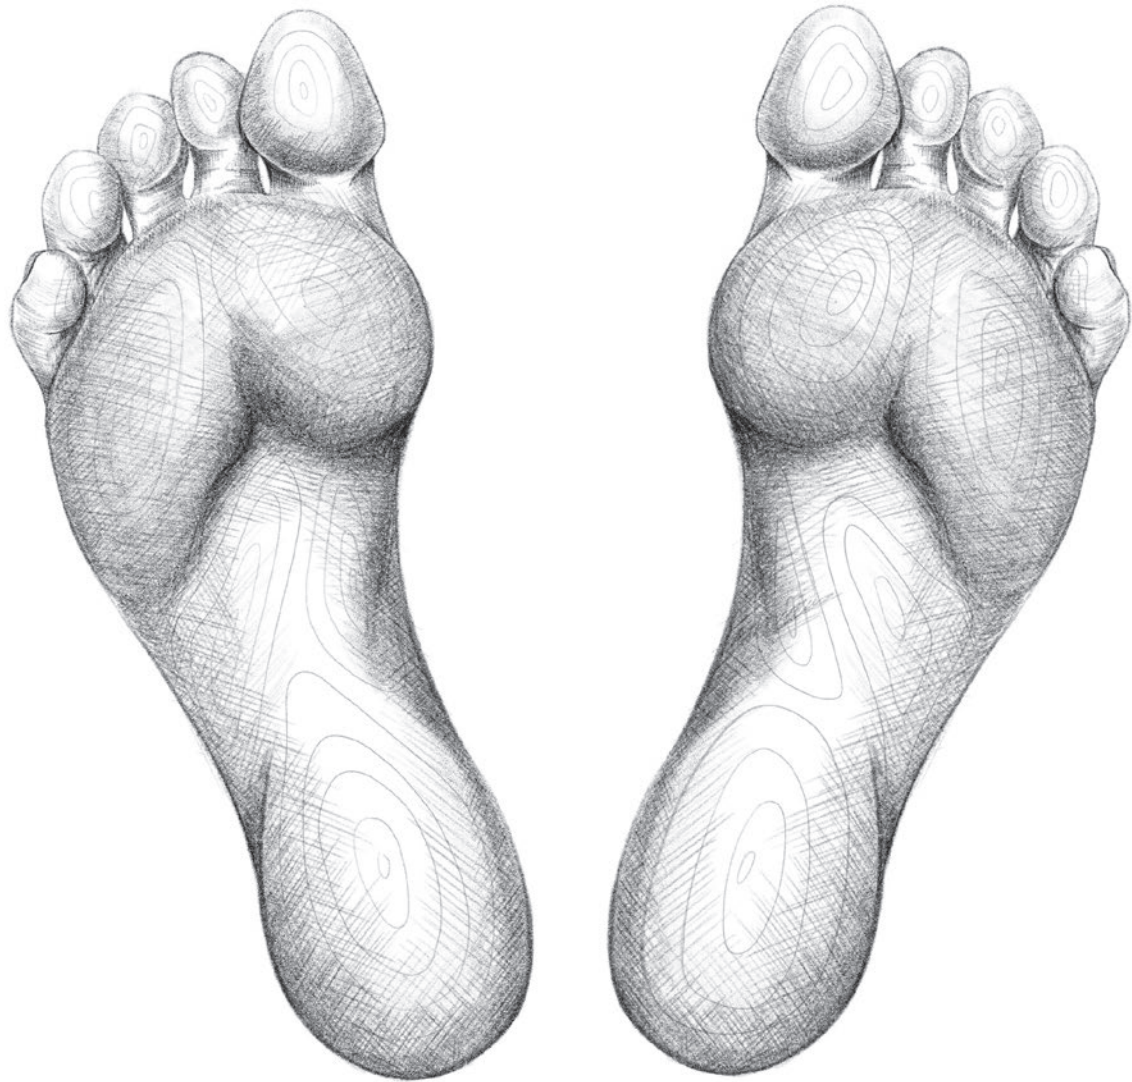

Proper body position in the armchair is essential for a relaxing and effective massage. The TITAN II's smart sensor system doubles the efficiency of the massage, informing in real time every movement of the massage arms and ensuring, based on their feedback, that the contact points act where needed.

The most advanced sensors ever used in a Komoder massage chair detect the distance between the sole and the legs, and the footrest automatically extends depending on the user's height. The multi-layer air cushion in the shoulder area provides a correct position of the upper body from the first seconds of use.

Due to its size and adaptability to the size of the various potential users, the TITAN II can be used by 30% more people than any other previous model.

INNOVATIONS  
IN THE MASSAGE  
OF THE LEGS AND SOLE

Discover the most advanced reflexology system you'll find in a massage chair: three massage rollers work on the soles, along with eight dedicated air cushions. The system targets the sensitive points of the sole, including under the heel, for a deep sensation and a truly stimulating experience whose beneficial effects you will feel throughout the body.

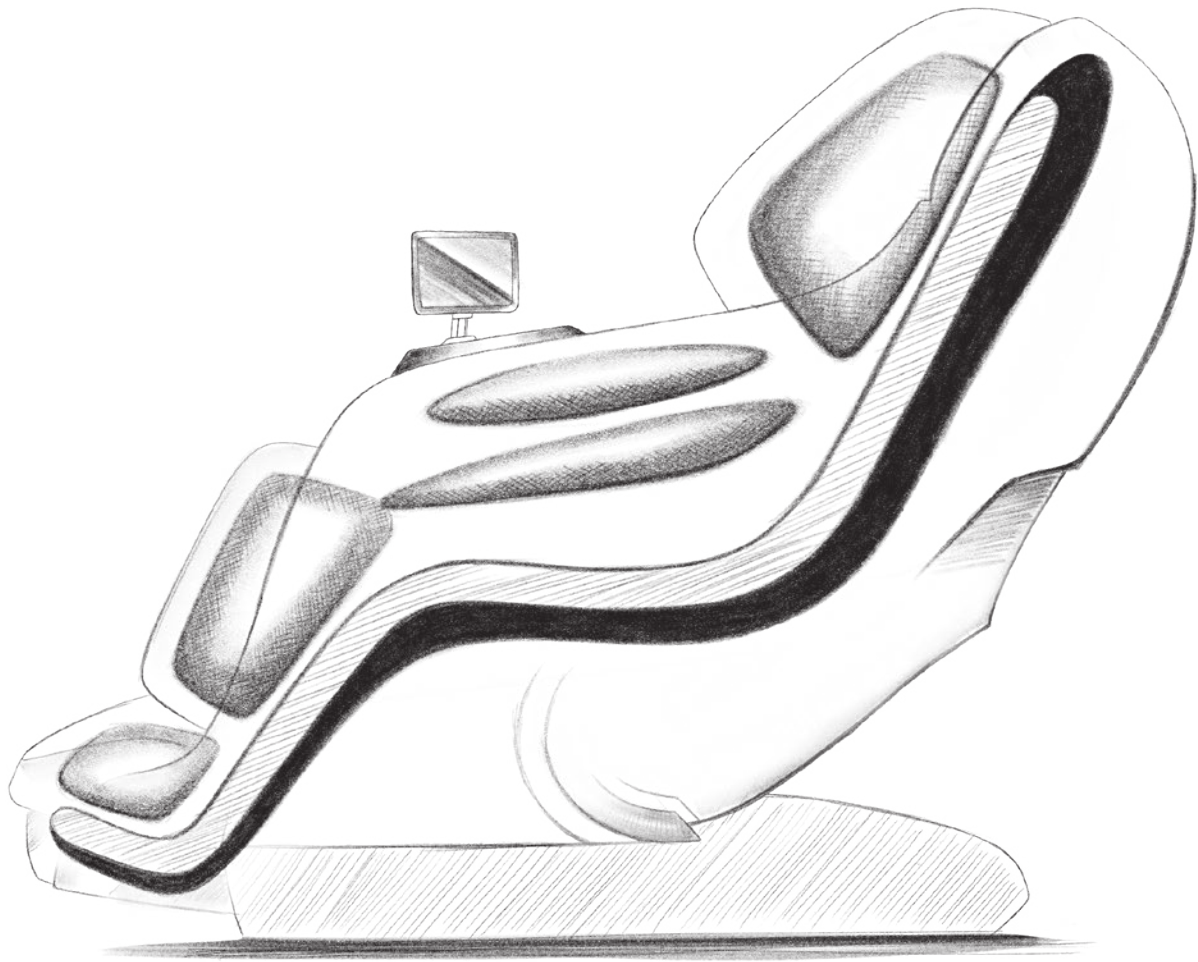

An innovation incorporated for the first time in the TITAN II massage chair is the leg massage mechanism: the six air cushions dedicated to this area of the body engage in kneading and circular movements, with a wide amplitude of 9 cm. This function stimulates circulation, increases muscle mobility and relaxes legs tired from long walks or long periods of standing.

Four other multi-layer air cushions are dedicated to the ankles, an area whose health is essential for blood circulation, using gripping and rubbing movements on the soft tissues and muscles.

# 24 AUTOMATIC MASSAGE PROGRAMS

A record number of 24 automatic massage programs, each with adjustable intensity, provide a function dedicated to different situations such as: the time of the day, different areas of your body, or your desired results.

► **Sweet Hug**

A super gentle, rhythmical massage designed to soften your muscles, warm your heart and melt the tension away.

► **Deep Release**

Deep Release Massage is a revitalising massage ideal for de-stressing, relieving fatigue and improving metabolism.

► **Stretching**

The stretching program targets the entire body. It is a must before and after your sports sessions, it is also to be adopted by anyone who spends a lot of time in the same position (in the office, in car etc.) since it helps to regain a correct posture.

► **Deep Breath**

The breathing program is designed to oxygenate your body, soothe the brain and help you find your peace of mind. Take a deep breath of fresh air and let yourself be carried away by the rhythm of the massage.

► **Pros**

A perfectly choreographed massage involving different techniques meant for the " exclusivist you ", soothing the pain and tension of the neck, shoulders and back areas.

► **For Him**

This Massage delivers a medium to high intensity massage experience, focusing on relieving ache and tension and boosting your confidence.

► **For her**

Ready for a supreme relaxing adventure? With this program, the muscular tensions, state of stress and anxiety of everyday life will disappear.

► **Senior**

The Senior Massage is a super soft session meant to relax your back, waist and hips muscles, helping to maintain a balanced metabolism and reverse aging effects.

► **Thai**

Thai massage works by applying pressure on precise energetic points, also grabbing, kneading, frictioning and stretching your entire body, your back and waist all in order to re-establish your body posture, increase your flexibility, ballance your body's energy flow and provide a feeling of general well-being in your daily life.

► **Chinese**

By using kneading, pressing and frictioning techniques, the Chinese Massage helps relax the lower back, aides in releasing tension and muscle strain, and also tightens your upper-back.

► **Pressure Massage**

This program uses firm but gentle pressing and pushing moves to give way to a complete body relaxation, and create other health benefits.

► **Ancient**

This program uses a combination of massage techniques and a variation of pressure intensities in order to completely relax body and mind. It also accelerates the healing process in the joints and muscles.

### ► **Morning Buzz**

Stimulating your entire body by using various techniques; the Morning Buzz Massage energizes you and prepares you for a full day ahead.

### ► **Power Boost**

A refreshing massage meant to improve alertness, to enhance performance and boost creativity.

### ► **Sweet Dreams**

A gentle and calming full body massage, using various massage techniques; it encourages relaxation to prepare you for a good night sleep.

### ► **Meditation**

Uses medium to low intensity massages for stress relief, increased calmness and mind sharpness.

### ► **Pre Workout**

A special massage program designed for active people in order to prevent them from injuries, speed up sports recovery, reduce tension in body tissues and stretch the muscles & ligaments.

### ► **Post Workout**

A deep massage using a mix of strong techniques, meant to help decrease tension in the muscles and increase the body's healing response rate.

### ► **After Running**

A full body stretching massage which focuses on the thighs, calves, hips, lower back, not neglecting the neck and shoulders either. It is what your muscles need in order to recover after a long run.

### ► **After Chores**

A soothing relaxing full body massage mixing multiple techniques: pushing, frictioning, tapping, kneading and grasping so you can easily forget about your exhausting daily chores.

### ► **Waist & Buttocks**

Designed to embrace your waist and push your hip muscles, the Waist & Buttocks massage can help diminish localised adipose tissue and improve body flexibility.

### ► **Neck & Shoulders**

With a combination of kneading, pressing and grabbing massage techniques. This session helps you ease the pain and stiffness in the neck and shoulders areas.

### ► **Back & Spine**

Focusing the massage on the spine, the Back & Spine Massage session can improve blood circulation, can restore energy levels and helps you keep the body injury free.

### ► **Legs & Feet**

Uses kneading, frictioning, rolling and pulling techniques which simulate real human hands to help ease stress and alleviate pain in the feet and lower legs.

## Create your own experience

---

A perfect experience means an experience that you can fully personalize exactly as you want it. In addition to adapting precisely to the shape of the body due to its intelligent sensors, every aspect of the TITAN II experience can be customised in detail.

With a simple touch of the touch screen or the rotation of a button, you can adjust the intensity of the actuation and the intensity of the 3D massage mechanism, both at the beginning of the massage program and at any time during the session.

## Auto Massage Programs

Tap on desired massage to start

Classic

### Thai

Thai focuses on the back and waist extension. Massage techniques are used to help adjust the skeletal structure and balance the energy system.

### Chinese

By using kneading, pressing and rubbing techniques, Chinese massage helps to relax the muscles and relieve tension in the body.

### Pushing

Pushing Massage uses firm but gentle pressing and pushing to promote relaxation, ease muscle tension, and create other health benefits.

### Ancient

Ancient uses the combination of techniques to relax the body, it helps to speed up the healing of our injuries and relieve muscular tension.

ZERO GRAVITY  
FLOATING SENSATION

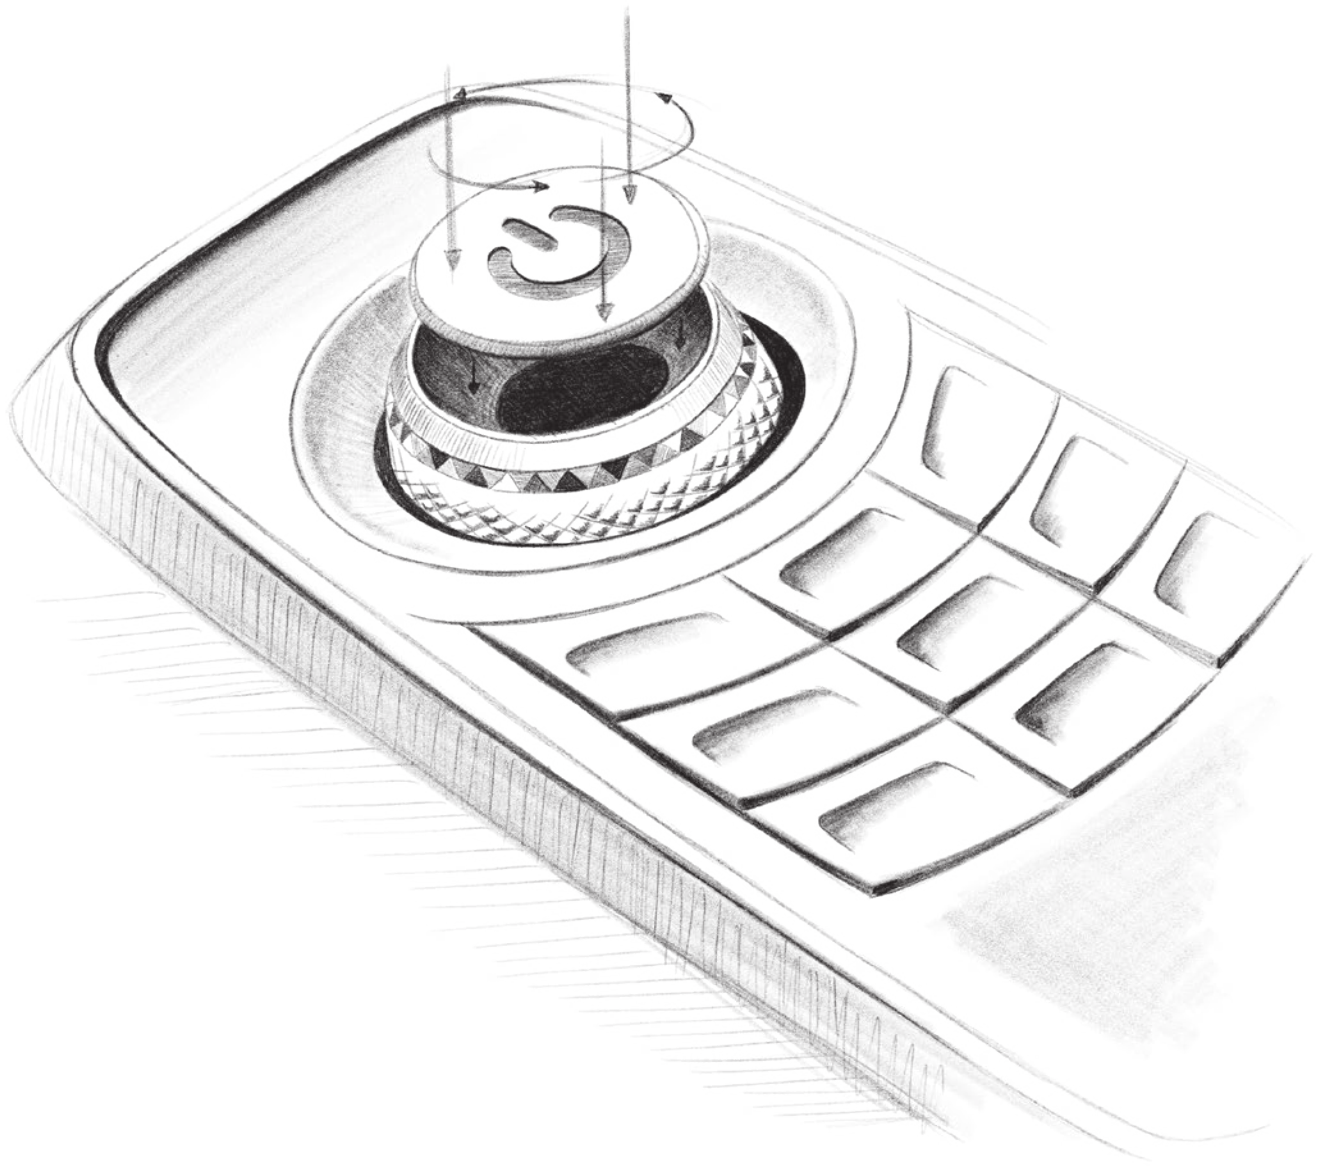

In the Zero Gravity position, the massage chair tilts to bring the legs higher than the upper body. This even weight distribution offers an unprecedented feeling of relaxation of the muscles of the whole body: as if you were floating in space, but much more comfortable!

You will rest hugged by 34 air cushions that have between two and four layers of protective material and thus support the body in a pleasant and natural way. Moreover, the air cushions in the calf and foot area actively participate in the massage of these areas, stimulate circulation and restore the mobility of tired muscles after a long day.

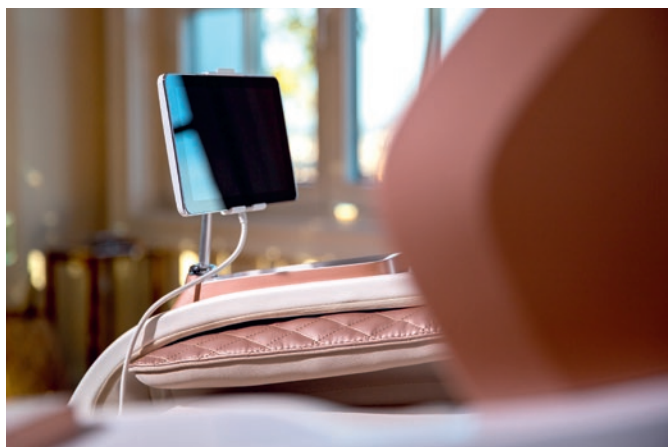

PERFECT CONTROL,  
AT YOUR FINGERTIPS

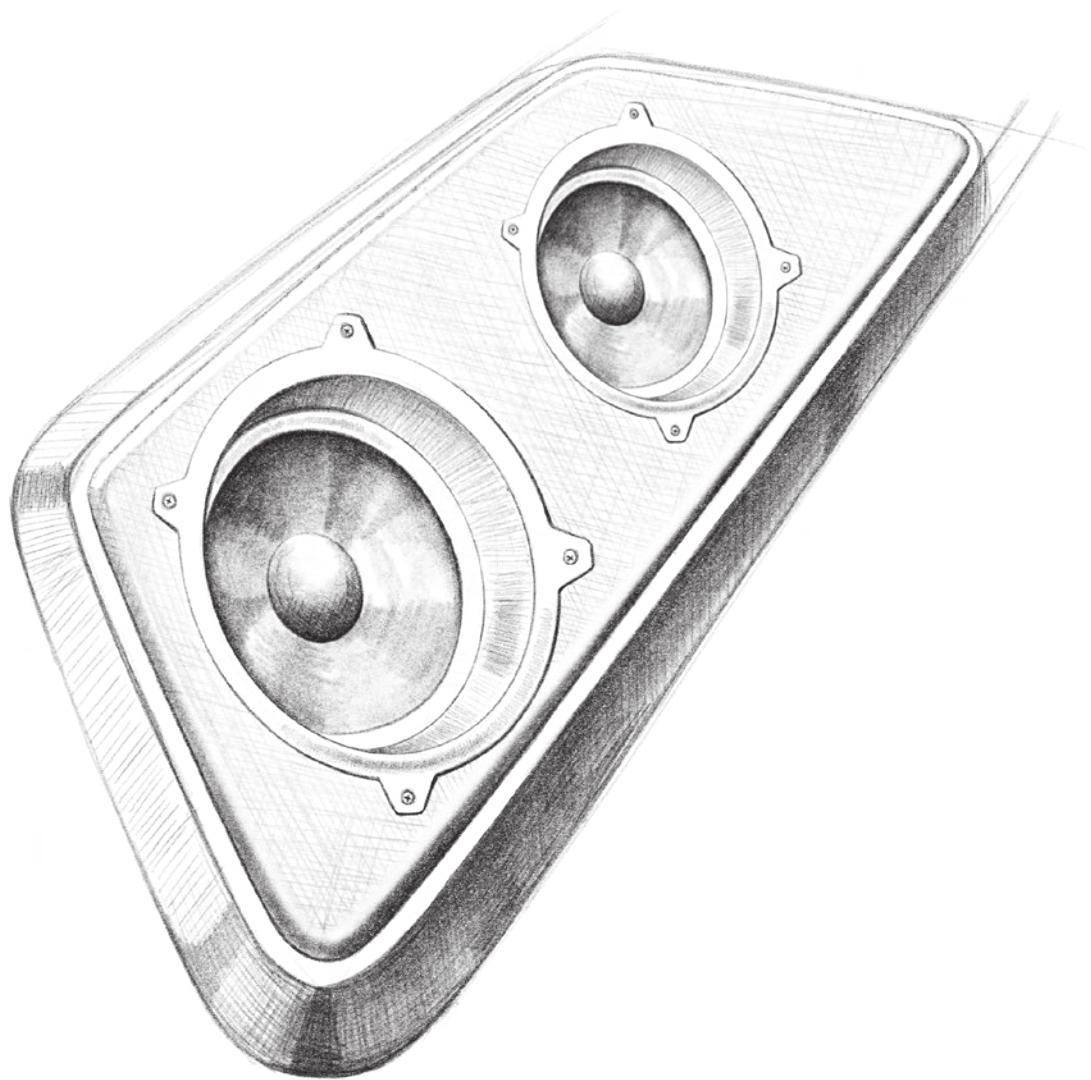

A simple push of the rotary knob starts the massage program, and by rotating you can always adjust the intensity of the 3D massage in the current program. The handy quick access buttons on the left arm allow active control of the massage chair.

On the right side, an 8-inch touchscreen tablet can be used to control every function of the massage chair in detail. In addition, during any massage program, the tablet displays details about it and real-time information about the area where the massage arms operate.

LOGGING IN OR ESCAPING?  
YOU ARE FREE TO CHOOSE

The audio system with Bluetooth connection includes Stereo Surround speakers that offer amplitude for complex soundtracks and faithfully reproduce sound fluctuations, to allow you to enjoy your favorite ambiance or music. The built-in ambient lights dance and shine in sync with the movements of the massage chair, adding a special touch to your favorite relaxing space. Also, if you prefer to have your mobile phone always at hand, it can be placed in the special holder that offers wireless charging or through USB cable.

## A futuristic design

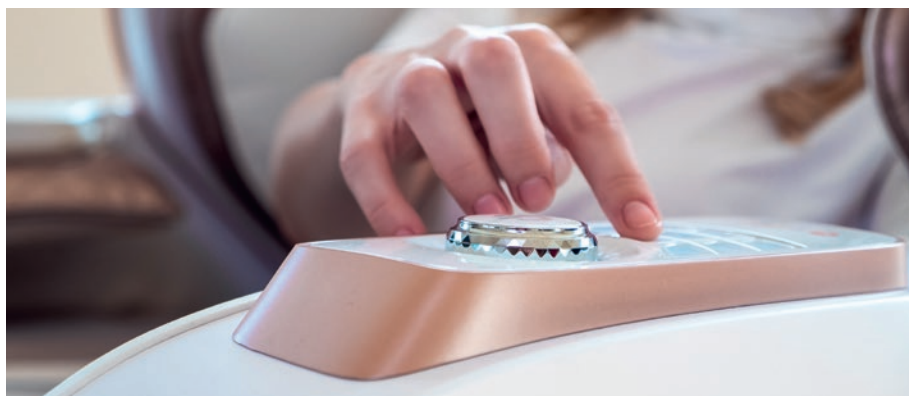

---

Tailored to those who appreciate it, TITAN II uses elegant-looking materials embedded in a fluid and versatile design, available in three color variants to complete the ambiance of your home.

The internal structure is metallic and extremely durable, which prevents the formation of recesses and increases the life of the massage chair. However, only four transparent buffer points touch the floor, while the massage chair slides suspended on them. When not in use, the massage chair recedes close to the wall so as not to take up space at the front.

This whole remarkable product is dressed in quality, environmentally friendly materials, which have passed the endurance test and have been tested for their flame retardant and safety qualities.
